Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Title: Perfect score:

Sequence: DTMRGALLVLALLVTQALGV......CMGEAVQNTVEDLKLNTLGR 111

Scoring table:

BLOSUM62 Gapop 10.0 , Gapext 0.5

Searched: 100059 seqs, 36664827 residues

Total number of hits satisfying chosen parameters: 100059

Minimum DB seq length: 0
Maximum DB seq length: 2000000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database : SwissProt_39:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

FUNCTION: THIS PROTEIN IS INVOLVED IN THE REPAIR OF MISMATCHES IN DNA. IT IS POSSIBLE THAT IT CARRY OUT THE MISMATCH RECOGNITION STEP. THIS PROTEIN HAS A MEAK ATPASE ACTUTY.
SIMILARITY: BELONGS TO THE DNA MISMATCH REPAIR MUTS FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ; PD001263; Muts_c

"Complete genome sequence of enterohemorrhagic Escherichia coli

"Complete genomic comparison with a laboratory strain K-12.";

DNA Res. 8:11-22(2001).

IN DNA, IT IS PROTEIN IS INVOLVED IN THE REPAIR OF MISMATCHES

IN DNA, IT IS POSSIBLE THAT IT CARRY OUT THE MISMATCH RECOGNITION

STEP. THIS PROTEIN HAS A WEAK ATPASE ACTIVITY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Perna N.T., Plunkett G.
